

Rakagali Resda Krisandi Putra

Project Manager & Software Engineer - Internship Candidate

Malang, East Java, Indonesia | 0895630887958 | Rakaesal@gmail.com | linkedin.com/in/rakagali | github.com/Rageel-28

Project Manager | Software Engineer | Planning, Team Coordination & Technical Execution

PROFESSIONAL SUMMARY

Motivated Informatics Engineering student (GPA 3.85) with a strong foundation in project management and full-stack development. Led four digital projects with teams of 3 to 8 people, from scope and weekly milestones through launch and handover, including a live village website serving 6,543 residents and a marketplace with 120 registered testers. Passionate about building reliable products and continuously learning new technologies. Eager to contribute as a Project Manager / Software Engineer intern from January to July 2027.

PROJECT EXPERIENCE

Project Manager & Business Model - PlayTest ID

Apr - Jun 2026

Two-sided B2B/B2C marketplace | Team of 4

- Coordinated a team of 4 building a two-sided marketplace that connects app developers with testers and helps developers meet Google Play's 14-day testing requirement; 10 missions published and 120 testers registered.
- Defined scope and weekly milestones for three parallel workstreams (Android, interface, data & reporting) across the April-June 2026 cycle.
- Designed the two-tier paid business model with Duitku payments and Xendit tester payouts, and automated test-report summaries using Groq.

Project Lead - Tulusbesar Village Website

Jul - Aug 2026

Polinema Community Service (KKN) | Team of 8 | tulusbesar.com

- Led a team of 8 from requirement interviews with village staff to a live public-service website at tulusbesar.com, serving 6,543 residents.
- Split the scope into three priority layers and acted as the single point of contact for village staff; administrative services, village profile, local business directory, and WebGIS went online within a two-month cycle.
- Built the frontend, UI/UX design, and part of the backend, and prepared a manual book and training session for the formal handover to the village office.

Project Manager & ML Developer - SmartReceipt

Oct 2026 - Present

Project-based learning | Team of 4

- Directed a team of 4 building an offline receipt-logging app with on-device OCR and automatic category classification.
- Trained a TF-IDF + Multinomial Naive Bayes classifier on 6,026 samples covering 1,419 unique products and 15 categories.
- Enforced a unique-product data split to prevent test-data leakage, so reported accuracy reflects products the model has never seen.

Team Lead & Full Stack - SPK PKH

2025

Decision support system | Team of 3

- Managed a team of 3 building a social-assistance recipient selection system that ranks candidates using PSI weighting and CODAS ranking.
- Defined data contracts between components so the interface and scoring logic could be built in parallel without dependency blocks.
- Provided a measurable, transparent, and auditable assessment trail for PKH candidate selection.

WORK EXPERIENCE

Business Development & Partner Acquisition - PT DNS Teknologi

2025

- Partner for client acquisition and sales-channel development for digital products in international markets.

Project Lead - Children's Game on Google Play - International client

2025

- Led a two-person team from concept to publishing a children's game on Google Play for an overseas client.
